IFRS FOR SMES

ISAFlow Demo (Pty) Ltd

Board Pack

1 January 2026 to 7 September 2026

DRAFT

Generated 8 September 2026

Confidential — for board use

Preparation Prepared by IsaFlow on 8 September 2026. This pack is a DRAFT — the fiscal period it ends in is still open, so these figures can still move and no commentary on this period has been approved, so nobody has signed off what it says.

Period covered Sep 2026 is a part month: it covers 7 of its 30 days, so its figure is not comparable with the months before it.

11 Matters for the board

12 Basis of preparation

The basis, in short

Standard and period IFRS for SMEs. 1 January 2026 to 7 September 2026. Figures in R'000 (ZAR), draft. Full basis on page 12.

The shape of this pack

Twelve sheets This pack is the same twelve sheets for every company, whatever its ledger holds. A sheet with little on it is a company with little posted, not a page that failed to print; where a figure or a chart cannot be drawn, the sheet says so in place of it.

Caveats

Caveat 1 No inventory could be identified in the chart of accounts, so the cash conversion cycle cannot be computed. No acid-test ratio is published; liquidity is read off the current and cash ratios.

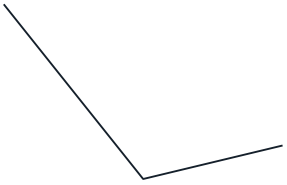

Caveat 2 This pack is a DRAFT — the fiscal period it ends in is still open, so these figures can still move and no commentary on this period has been approved, so nobody has signed off what it says.

DRAFT

Revenue of 101. Operating margin is a negative 1522.9%.

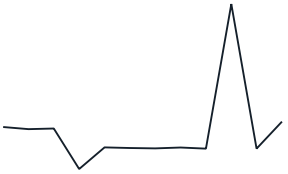

Revenue[1]
101

Gross margin[1]
(1310.8%)

Operating profit
(1 544)

Net profit[1]
(1 544)

Cash[1]
(531)

Debt-to-equity
Equity is negative — liabilities exceed assets, so this ratio inverts and cannot be ranked.

Debtor days[1]
213 days

Working capital
(3 821)

Commentary

Revenue The prior figure is not a positive base, so no percentage change is meaningful.

Gross margin The comparative period carries no value for this measure, so no movement is shown.

Operating profit The prior figure is not a positive base, so no percentage change is meaningful.

Net profit The prior figure is not a positive base, so no percentage change is meaningful.

Cash The prior figure is not a positive base, so no percentage change is meaningful.

Debt-to-equity Not available. Equity is negative — liabilities exceed assets, so this ratio inverts and cannot be ranked.

Debtor days The comparative period carries no value for this measure, so no movement is shown.

Working capital The prior figure is not a positive base, so no percentage change is meaningful.

Reading these tiles

Comparison basis Each movement is measured against 26 April 2025 to 31 December 2025 — the comparative period the basis page states, and the prior column the statement pages print. A movement is never shown as a move from zero; a tile with none says why in its line of the Commentary above.

Part month Every tile covers the whole period, whose last month — Sep 2026 — is 7 of its 30 days.

Scale Figures are in R'000 (ZAR). Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.

1 Each tile's figure covers the WHOLE reporting period; the sparkline beside it runs over the monthly trend series, a different window. 5 of 8 tiles carry one; the rest have no monthly series behind them. Gross margin and Debtor days plot 3 of the window's 12 months: a month with no meaningful figure is dropped rather than drawn as zero, so lines of the same width do not all cover the same months. Revenue, Net profit and Cash share one y-scale, (1 621) to 1 908, so none of them can look like it moved more than it did. Gross margin on (1138.7%) to 5323.5% and Debtor days on 19 days to 60 days are in other units, each drawn on its own.

DRAFT

3 of 29 matters requiring a board decision are put to the board on this page, the largest carrying 1 869 of exposure, in R'000.

Commentary pending approval.

For the board

DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY

Annual Financial Statements for FY2024: 739 days overdue (due 29 August 2024) — Whether to file immediately, accepting any penalty exposure.

Annual Financial Statements for FY2026: 10 days overdue (due 28 August 2026) — Whether to file immediately, accepting any penalty exposure.

Jul 2026: expenses for the month are a net credit — more was reversed out of expense accounts than was posted into them, so the month reports a profit the period does not. The quantum is that credit, 1 869; the month's net profit of 1 908 is that credit plus revenue and other income of 39. Whether the reversals behind the credit belong to this period.

1 further matter follows on the matters page. 25 further matters are not printed in this pack; the matters page states what they come to.

How this page is prepared

Commentary This page carries the board's own commentary on the period. It prints only once an approver has signed it; until then the page says so rather than printing unapproved text.

Action panel The panel headed 'For the board' is derived from the same checks the matters page tabulates — aged debtor concentration, unreconciled bank items, unusual journals, overdue statutory filings and months whose expenses are a net credit — in the order the matters page prints them: matters with no single rand amount first, then the largest by exposure. It is machine-written and states the decision each matter is waiting on, never a recommendation.

What debtor days is measured on

The base Debtor days on the highlights and scorecard pages is taken on trade receivables of 59, the trade-receivable control account in the general ledger and the figure the balance sheet states. The open customer subledger for the same date is 10 724, in R'000. The two are not reconciled — the matters page sets out what the difference consists of — and this pack does not recompute the ratio on the other base. Read the day count as a measure of the control account, not of what customers owe.

Panels that cover part of the window

Why some panels are shorter Gross margin and Debtor days are drawn over fewer than the 12 months the trends page covers. A ratio is not measured in a month whose base is nil, so those panels start at the first month they can be measured rather than being plotted as a zero, and each panel's own title states how many periods it covers. A panel is omitted where its figure is meaningful in no period of the window, and the trends page says so where that happens.

DRAFT

Net profit is lowest at (784) in Jan 2026 and highest at 1 908 in Jul 2026 across the 12 months.

R'000

	REVENUE	OTHER INCOME	COST OF SALES	OPERATING	OTHER	NET PROFIT

Sep 2026 (part)	30	–	–	41	–	(11)
12 months to Sep 2026 (part)[1]	**101**	**18**	**1 751**	**269**	**–**	**(1 901)**

Reading this table

The columns[1] Revenue is turnover; Other income is what the income statement reports separately. Expenses fall in three: Cost of sales; Operating, above the operating line; Other, below it. The two income columns less the three expense columns are the month's net profit, so each row adds across.

The window This table covers 12 months to Sep 2026 (part), the window page 10 draws from. The income statement overleaf carries the reporting period's own totals against the comparative. Sep 2026 is a part month: it covers 7 of its 30 days, so its figure is not comparable with the months before it.

The reporting period's EBITDA

EBITDA EBITDA for the reporting period is (1 467). The comparative period's is (905). It is operating profit plus the movement on depreciation and amortisation, and it is presented because a board asks for it, not because a standard requires it. Every figure above covers a month or the 12 months to Sep 2026 (part); this one covers the reporting period. The basis of preparation reconciles both to operating profit line by line.

> DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY
>
> Jul 2026 carried the most revenue of any month, 37 of the 101 earned over 12 months to Sep 2026 (part) — 36.6% of it. The largest figure among the months above the wrong side of its band is Jul 2026's cost of sales of (1 922): more was reversed out of those accounts than was posted into them.

1 Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.

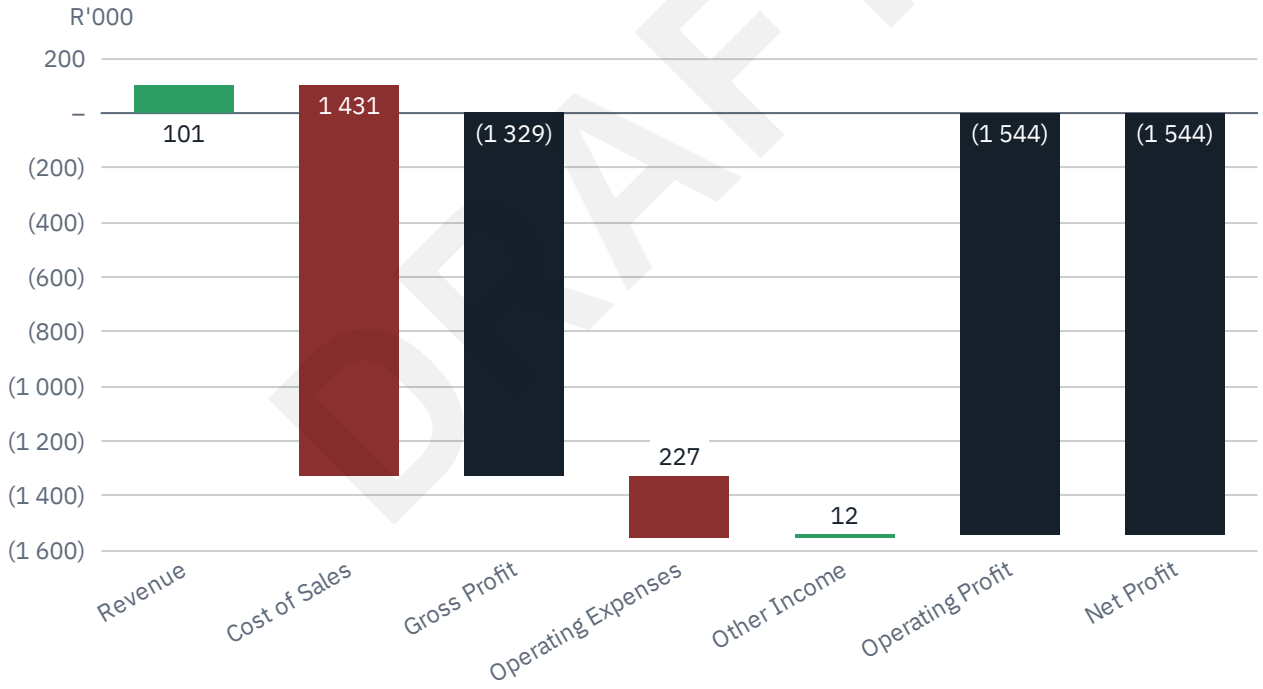

DRAFT

Gross margin is a negative 1310.8% on revenue of 101.

	R'000				
	ACTUAL	PRIOR[2]	CHANGE	CHANGE %	% OF REVENUE
Revenue	101	–	101	n/m[a]	+100.0%
Cost of sales[3]	1 431	805	626	+77.8%	+1410.8%
Gross profit[4]	**(1 329)**	**(805)**	**(524)**	**n/m[a]**	**(1310.8%)**
Operating expenses	227	112	115	+102.1%	+223.7%
Other income	12	12	(<1)	(2.9%)	+11.6%
Operating profit	**(1 544)**	**(905)**	**(639)**	**n/m[a]**	**(1522.9%)**
Other expenses	–	–	–	n/m[a]	–
Net profit[1]	**(1 544)**	**(905)**	**(639)**	**n/m[a]**	**(1522.9%)**

a n/m — The prior figure is not a positive base, so no percentage change is meaningful.

Revenue of 101 bridges to net profit of (1 544).

DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY

Cost of sales moved the most in money, up 626.

1 Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.
2 The prior column is the period 26 April 2025 to 31 December 2025 — 250 days, the same length as the reporting period.
3 The table states each line as the ledger carries it. The bridge below POSITIONS each bar by its effect on net profit — up where the line added to it, down where it took away — and COLOURS it by what the line is: green for income, red for cost, dark for a total, in every pack and whichever way the period ran. Cost of Sales of 1 431 in the table is labelled with that same figure on the bridge, drawn DOWNWARDS because that is the direction it reduces profit, and in red, because it is a cost line. The label and the position are the same fact read two ways. A line with a nil figure for the period is not drawn: Other Expenses.
4 Gross margin on this page is the figure for the WHOLE reporting period, measured on the period totals; the trends page plots the same measure a month at a time. Different windows: the two need not agree.

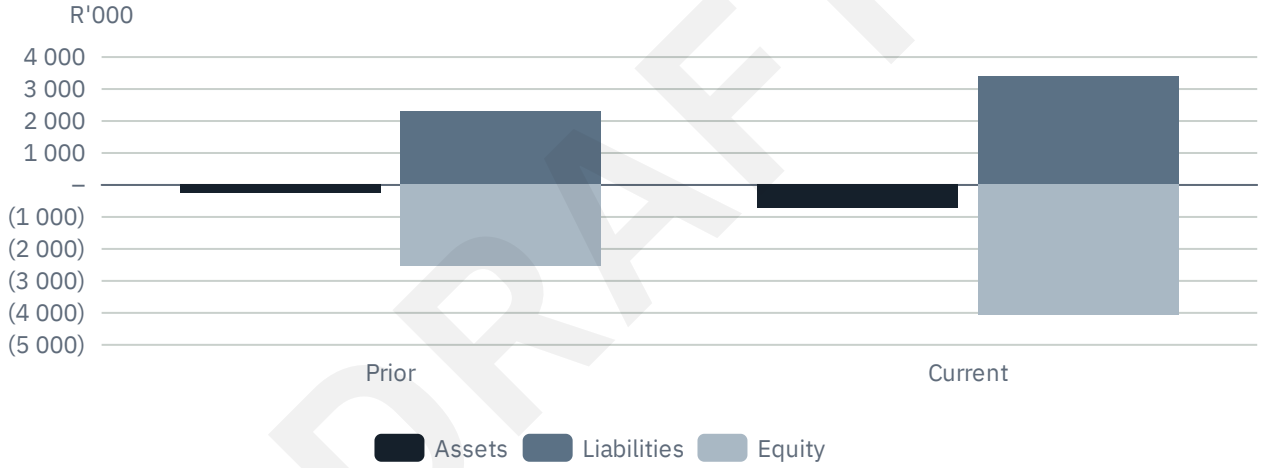

DRAFT

Negative equity of (4 087).

	R'000			
	ACTUAL	PRIOR[2]	CHANGE	CHANGE %
Current assets[3]	(464)	(125)	(339)	n/m[a]
Non-current assets	(266)	(137)	(129)	n/m[a]
Total assets	**(730)**	**(262)**	**(468)**	**n/m[a]**
Current liabilities[3]	3 357	2 281	1 076	+47.2%
Non-current liabilities	–	–	–	n/m[a]
Total liabilities	**3 357**	**2 281**	**1 076**	**+47.2%**
Total equity[1]	**(4 087)**	**(2 543)**	**(1 544)**	**n/m[a]**

a n/m — The prior figure is not a positive base, so no percentage change is meaningful.

Assets of (730) are matched by liabilities of 3 357 and equity of (4 087).

DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY

Current assets cover current liabilities at negative 13.8% — a current ratio of (0.14); working capital stands at (3 821).

Balances below zero

What this means Current assets are (464), non-current assets (266) and total assets (730). An asset below zero is not a balance a business can hold: it means one or more accounts classified as assets carry credit balances. That is a classification or a posting question rather than a smaller figure, and the pack reports the ledger as it stands: the balances should be resolved before this sheet is relied on.

Negative equity

Consequence Total equity is (4 087). Liabilities exceed assets by this amount, which may affect covenant compliance and the going-concern assessment.

1 Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.
2 The prior column is the period 26 April 2025 to 31 December 2025 — 250 days, the same length as the reporting period.
3 Memorandum: trade receivables are 59 and trade payables 3 091 at the period end, against nil and 2 281 at the comparative period end, in R'000. They are the numerators of debtor days and creditor days on the scorecard page, each column on its own period.

DRAFT

Cash stands at (531); the comparative cash figure is negative, so the percentage change is not meaningful.

R'000

	ACTUAL	PRIOR[2]	CHANGE	CHANGE %
Opening cash[3]	**(125)**	**n/m[a]**	**n/m[a]**	**n/m[a]**
Operating cash flow	n/m[b]	n/m[b]	n/m[b]	n/m[b]
Investing cash flow	n/m[c]	n/m[c]	n/m[c]	n/m[c]
Financing cash flow	n/m[d]	n/m[d]	n/m[d]	n/m[d]
Closing cash[1]	**(531)**	**(125)**	**(406)**	**n/m[e]**

a n/m — The period before the comparative period is not in this pack, so there is no earlier opening cash balance to measure this one against.
b n/m — No operating cash flow figure was captured for this period.
c n/m — Investing cash flow is taken from capital expenditure, and no capital expenditure figure was captured for this period.
d n/m — No financing cash flow figure was captured for this period.
e n/m — The prior figure is not a positive base, so no percentage change is meaningful.

Movement in cash, and why no bridge is drawn

This period Cash moved (125) to (531) over the period, a movement of (406). No bridge is drawn because there is nothing to bridge THROUGH: this pack's figure set carries the period's cash totals and none of the operating, investing or financing figures a cash flow statement is made of, so every step between the two balances would be one unmeasured step the width of the whole movement. Ask for the cash flow statement for the split.

Closing cash fell from (115) at Oct 2025 to (531) at Sep 2026 (part), over 12 periods. Sep 2026 is a part month: it covers 7 of its 30 days, so its figure is not comparable with the months before it.

Commentary

This period No operating cash flow figure was captured for this period.

1 Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.
2 The prior column is the period 26 April 2025 to 31 December 2025 — 250 days, the same length as the reporting period.
3 Opening cash in the table above is the balance at the START of the reporting period. The closing-cash line below it plots 12 months to the period end and opens at Oct 2025, so it starts from the balance at that month instead. Different windows: the two need not agree.

DRAFT

0 of 3 scored targets were met this period.

A. Profitability

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Gross margin	(1310.8%)	+35.0%	n/m[a]	MISSED
Operating margin	(1522.9%)	–	n/m[a]	UNSCORED

B. Liquidity

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Current ratio[1]	(0.14)	1.50	(0.05)	MISSED
Cash ratio	(0.16)	–	(0.05)	UNSCORED

C. Working capital

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Debtor days[1]	213 days	30 days	n/m[b]	MISSED
Creditor days	789 days	–	1 035 days	UNSCORED

D. Leverage

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Debt-to-equity	n/m[c]	0.50	n/m[c]	NOT MEANINGFUL
Interest cover	n/m[d]	–	n/m[d]	NOT MEANINGFUL

E. Cash flow

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Operating cash flow	n/m[e]	–	n/m[e]	NOT MEANINGFUL
Cash conversion cycle	n/m[f]	–	n/m[f]	NOT MEANINGFUL

a n/m — In the comparative period: revenue is not positive, so there is no turnover to take a margin of.
b n/m — In the comparative period: revenue is not positive, so days of sales outstanding cannot be measured.
c n/m — Equity is negative — liabilities exceed assets, so this ratio inverts and cannot be ranked.
d n/m — Interest expense is not captured in the pack figure set.
e n/m — No operating cash flow figure was captured for this period.
f n/m — No inventory could be identified in the chart of accounts, so the cash conversion cycle cannot be computed.

> DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY
>
> The misses are in Profitability, Liquidity and Working capital.

Scoring basis

Definitions A target the figures cannot support is not scored; the basis page defines the terms.

1 Scored on current assets and trade receivables, which this pack qualifies elsewhere and does not adjust. Debtor days here is the figure for the WHOLE reporting period, annualised on 365 days whatever its length; the trends page plots it a month at a time.
2 The prior column is the period 26 April 2025 to 31 December 2025 — 250 days, the same length as the reporting period.

DRAFT

Revenue runs from nil in Oct 2025 to 30 in Sep 2026 (part), across the 12-month series.

Revenue rose from nil to 30 in Sep 2026 (part) over 12 periods. Own scale: its axis is 1.0% of the shared one, too little to show on it.

Gross margin fell from 5323.5% to 100.0% in Sep 2026 (part) over 3 periods. Own scale: a percentage, not R'000.

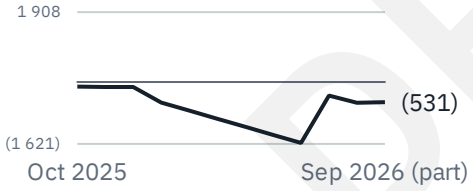

Operating expenses rose from 15 to 41 in Sep 2026 (part) over 12 periods. Own scale: its axis is 1.6% of the shared one, too little to show on it.

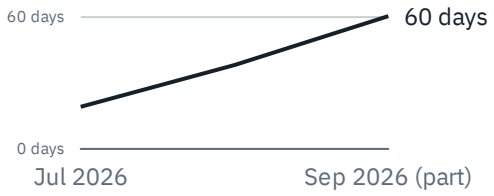

Net profit rose from (99) to (11) in Sep 2026 (part) over 12 periods. Jul 2026 alone is 1 908 — a month whose expenses were a net credit; drop it and the SHARED range becomes (1 621) to 58, 52.4% narrower.

Cash fell from (115) to (531) in Sep 2026 (part) over 12 periods.

Debtor days rose from 19 days to 60 days in Sep 2026 (part) over 3 periods. Own scale: a day count, not R'000.

DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY

6 measures are drawn over the period; each panel states where it started and where it ended. The shared y-scale spans (1 621) to 1 908, a span of 3 529, in R'000, over 4 money panels, drawn on 2; a panel's percentage of it is its own axis, both ends printed.

Reading these panels

Scale Net profit and Cash share one y-scale, so neither of them can look like it moved more than it did. Revenue at 1.0% and Operating expenses at 1.6%, too little of it to register, and Gross margin and Debtor days, in different units, are on their OWN scales, so their slopes are not comparable with the shared-scale panels.

Period Each panel plots one MONTH. The same measures print for the WHOLE period — revenue, gross margin, operating expenses and net profit on the income statement page, cash on the cash page and debtor days on the scorecard page — against the comparative, except gross margin and debtor days. Different windows: the two need not agree. Debtor days also differs in its annualisation, which the basis page defines. A ratio ending in the part month is taken on the sums posted, so its level is not comparable with the months before it.

DRAFT

29 matters require a board decision, 27 of them carrying 3 544 of exposure, in R'000.

ISSUE	QUANTUM (R'000)	OWNER	DECISION REQUIRED
Annual Financial Statements for FY2024: 739 days overdue (due 29 August 2024)	n/m[a]	Company secretary	Whether to file immediately, accepting any penalty exposure.
Annual Financial Statements for FY2026: 10 days overdue (due 28 August 2026)	n/m[a]	Company secretary	Whether to file immediately, accepting any penalty exposure.
Jul 2026: expenses for the month are a net credit — more was reversed out of expense accounts than was posted into them, so the month reports a profit the period does not. The quantum is that credit, 1 869; the month's net profit of 1 908 is that credit plus revenue and other income of 39.	1 869	Finance	Whether the reversals behind the credit belong to this period.
Journal JE-2026-00075 (recorded well after its entry date): Payroll run 2026-03	339	Finance	Whether the entry's evidence stands, or it is referred for reversal.

25 further matters are not printed. A board pack is the same twelve sheets for every company however busy its ledger, so this table is held to the paper this page has: matters with no single rand amount are listed first, then the largest by exposure. In total they come to 1 336, in R'000.

a n/m — This matter has no single rand amount — an overdue filing, or a check that found nothing to quantify.

Movement Not tracked — no prior board pack is stored to compare against. The same for every matter listed above.

Commentary pending approval.

Two debtors figures

The subledger against the balance sheet The open customer subledger totals 10 724 and the balance sheet states trade receivables of 59, a difference of 10 665, in R'000. Between that subledger and the trade-receivable control account in the general ledger: 10 665 across 169 open documents carrying no link to a journal entry, 2 across 984 postings that reference no document and (1) across 12 open documents whose linked journal has not reached the control account. Together they account for all of it, before rounding. On these books the two do not agree, this pack does not adjust either figure to the other, and the difference should be explained before any decision above that rests on a debtors balance is taken.

What was checked

Sources Aged debtor concentration, unreconciled bank items, unusual journals, overdue statutory filings and months whose expenses are a net credit. A source that fails is named as a matter, never dropped.

DRAFT

Prepared under IFRS for SMEs from the IsaFlow general ledger, in R'000; 2 caveats qualify these figures, printed with the contents.

Basis of preparation

Standard and currency IFRS for SMEs. ZAR in R'000.
Reporting entity ISAFlow Demo (Pty) Ltd alone. These figures are not consolidated.
Period 1 January 2026 to 7 September 2026. The series ends on a part month: Sep 2026 covers 7 of its 30 days.
Comparative period 26 April 2025 to 31 December 2025

Source system IsaFlow general ledger
Rounding Components may not add exactly to the totals shown. A ratio taken on the unrounded figures may not reproduce from the rounded ones beside it.
Extracted at 8 September 2026 at 20:05 SAST
Ledger version 7 September 2026 at 17:45 SAST

Negative figures
In brackets — (12 345) — for money, percentages and ratios; a percentage in prose, in words. No minus sign is used in this pack. Only a positive value takes a +.

Not meaningful (n/m)
A measure the figures cannot support. The pack prints the reason rather than a number, never a zero. A dash (–) is that zero: a figure measured and nil, bar Scored below. A real amount too small to show at this scale prints as <1, or (<1) where it is negative.

Gross margin
Gross profit (revenue less cost of sales), as a percentage of revenue.

Operating margin
Operating profit as a percentage of revenue.

EBITDA
Earnings before interest, tax, depreciation and amortisation — a non-IFRS measure, taken from operating profit (already stated before interest and tax) plus the movement on depreciation and amortisation. The reconciliation below is the whole of it; no other adjustments.

	ACTUAL	PRIOR
Operating profit (IFRS)	(1 544)	(905)
Add back: depreciation and amortisation	77	–
EBITDA	(1 467)	(905)

Working capital
Current assets less current liabilities, in rand.

Current ratio
Current assets divided by current liabilities.

Cash ratio
Cash and cash equivalents divided by current liabilities.

Debt-to-equity
Total liabilities divided by total equity. Not reported on negative equity: the quotient inverts.

Interest cover
Operating profit divided by net interest expense. This pack captures no interest expense line, so it is reported as not meaningful.

Debtor days
Trade receivables over revenue, times 365 — an annualised figure on the scorecard and highlights, whatever the length of the reporting period. The trends page instead multiplies each month's ratio by the days in that month, so the two need not agree.

Creditor days
Trade payables over cost of sales, times 365 — annualised, whatever the length of the reporting period. Not reported where there is no cost of sales.

Cash conversion cycle
Debtor days plus inventory days (inventory over cost of sales, times 365), less creditor days — each annualised on 365 days, as above. Not reported where no account is classified as inventory.

Operating, investing and financing cash flow
Cash from operations before the other two; cash spent on or raised from capital assets; and cash raised from or repaid to funders and shareholders.

Scored, unscored and not meaningful
Scored against the platform's default target. A metric with no target is unscored rather than assumed met, and its TARGET cell prints a dash rather than a nil target; one the figures cannot support is not meaningful. Neither counts as a pass or a miss.

Colour

Key On the bridge, green is an income line, red a cost line and dark ink a total; all three also differ in lightness, so a monochrome copy still separates them. The balance sheet's bands are one ink at three lightnesses, legended on the chart. Red on the scorecard marks a missed target.

DRAFT
