IFRS FOR SMES

Brightsphere Technologies (Pty) Ltd

Board Pack

1 January 2026 to 7 September 2026

DRAFT

Generated 2026-09-08

Confidential — for board use

Preparation Prepared by IsaFlow on 8 September 2026. This pack is a DRAFT — no commentary on this period has been approved, so nobody has signed off what it says.

Period covered Sep 2026 is a part month: it covers 7 of its 30 days, so its figure is not comparable with the months before it.

11 Matters for the board

12 Basis of preparation

The basis, in short

Standard and period IFRS for SMEs. 1 January 2026 to 7 September 2026. Figures in R'000 (ZAR), draft. Full basis on page 12.

The shape of this pack

Twelve sheets This pack is the same twelve sheets for every company, whatever its ledger holds. A sheet with little on it is a company with little posted, not a page that failed to print; where a figure or a chart cannot be drawn, the sheet says so in place of it.

Caveats

Caveat 1 No inventory could be identified in the chart of accounts, so the cash conversion cycle cannot be computed. No acid-test ratio is published; liquidity is read off the current and cash ratios.

Caveat 2 Nothing has been posted to the ledger since 29 April 2026, before the end of the reporting period, so the 5 months after it are nil because the ledger has not moved.

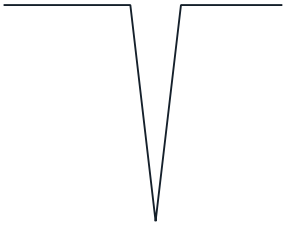

Caveat 3 This pack is a DRAFT — no commentary on this period has been approved, so nobody has signed off what it says.

DRAFT

Revenue of (5 535). There is no meaningful operating margin on non-positive turnover.

Revenue[1]

(5 535)

Gross margin

Revenue is not positive, so there is no turnover to take a margin of.

Operating profit

(1 819)

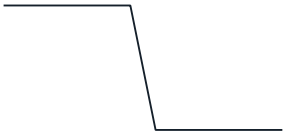

Net profit[1]

(1 408)

Cash[1]

(3 453)

Debt-to-equity

Equity is negative — liabilities exceed assets, so this ratio inverts and cannot be ranked.

Debtor days

Revenue is not positive, so days of sales outstanding cannot be measured.

Working capital

(9 164)

DRAFT

Commentary

Revenue The prior figure is not a positive base, so no percentage change is meaningful.

Gross margin Not available. Revenue is not positive, so there is no turnover to take a margin of.

Operating profit The prior figure is not a positive base, so no percentage change is meaningful.

Net profit The prior figure is not a positive base, so no percentage change is meaningful.

Cash The prior figure is not a positive base, so no percentage change is meaningful.

Debt-to-equity Not available. Equity is negative — liabilities exceed assets, so this ratio inverts and cannot be ranked.

Debtor days Not available. Revenue is not positive, so days of sales outstanding cannot be measured.

Working capital The prior figure is not a positive base, so no percentage change is meaningful.

Reading these tiles

Comparison basis Each movement is measured against 26 April 2025 to 31 December 2025 — the comparative period the basis page states, and the prior column the statement pages print. A movement is never shown as a move from zero; a tile with none says why in its line of the Commentary above.

Part month Every tile covers the whole period, whose last month — Sep 2026 — is 7 of its 30 days.

Scale Figures are in R'000 (ZAR). Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.

1 Each tile's figure covers the WHOLE reporting period; the sparkline beside it runs over the monthly trend series, a different window. 3 of 8 tiles carry one; the rest have no monthly series behind them. Revenue, Net profit and Cash share one y-scale, (5 535) to nil, so none of them can look like it moved more than it did.

3 of 31 matters requiring a board decision are put to the board on this page, the largest carrying 4 128 of exposure, in R'000.

Commentary pending approval.

For the board

DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY

Annual Financial Statements for FY2026: 10 days overdue (due 28 August 2026) — Whether to file immediately, accepting any penalty exposure.

Apr 2026: expenses for the month are a net credit — more was reversed out of expense accounts than was posted into them, so the month reports a loss even with the credit, as the period does. The quantum is that credit, 4 128; the month's net profit of (1 408) is that credit plus revenue and other income of (5 536). Whether the reversals behind the credit belong to this period.

Aged debtor concentration: Blitz Fibre owes 3 192, 77.0% of all debtors owed on the aged debtors report, which come to 4 146, in R'000. Whether to escalate, hold credit, or refer the account for write-off.

1 further matter follows on the matters page. 27 further matters are not printed in this pack; the matters page states what they come to.

How this page is prepared

Commentary This page carries the board's own commentary on the period. It prints only once an approver has signed it; until then the page says so rather than printing unapproved text.

Action panel The panel headed 'For the board' is derived from the same checks the matters page tabulates — aged debtor concentration, unreconciled bank items, unusual journals, overdue statutory filings and months whose expenses are a net credit — in the order the matters page prints them: matters with no single rand amount first, then the largest by exposure. It is machine-written and states the decision each matter is waiting on, never a recommendation.

How current these figures are

Ledger currency Nothing has been posted to the ledger since 29 April 2026, before the end of the reporting period. The 5 months after that date are nil on the monthly pages because the ledger has not moved, not because the company transacted nothing: every figure in this pack is the ledger as it stood on that date. The basis of preparation states the ledger version in full.

DRAFT

Net profit is lowest at (1 408) in Apr 2026 and highest at nil in 11 of the 12 months.

Reading this table

The columns[1] Revenue is turnover; Other income is what the income statement reports separately. Expenses fall in three: Cost of sales; Operating, above the operating line; Other, below it. The two income columns less the three expense columns are the month's net profit, so each row adds across.

The window This table covers 12 months to Sep 2026 (part), the window page 10 draws from. The income statement overleaf carries the reporting period's own totals against the comparative. Sep 2026 is a part month: it covers 7 of its 30 days, so its figure is not comparable with the months before it.

The reporting period's EBITDA

EBITDA EBITDA for the reporting period is (1 971). The comparative period's is nil. It is operating profit plus the movement on depreciation and amortisation, and it is presented because a board asks for it, not because a standard requires it. Every figure above covers a month or the 12 months to Sep 2026 (part); this one covers the reporting period. The basis of preparation reconciles both to operating profit line by line.

> DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY
>
> Nothing at all is posted in 11 of the 12 months shown: Apr 2026 alone carries the whole of the postings over 12 months to Sep 2026 (part). The largest figure among the months above the wrong side of its band is Apr 2026's revenue of (5 535): more was reversed out of those accounts than was posted into them.

1 Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.

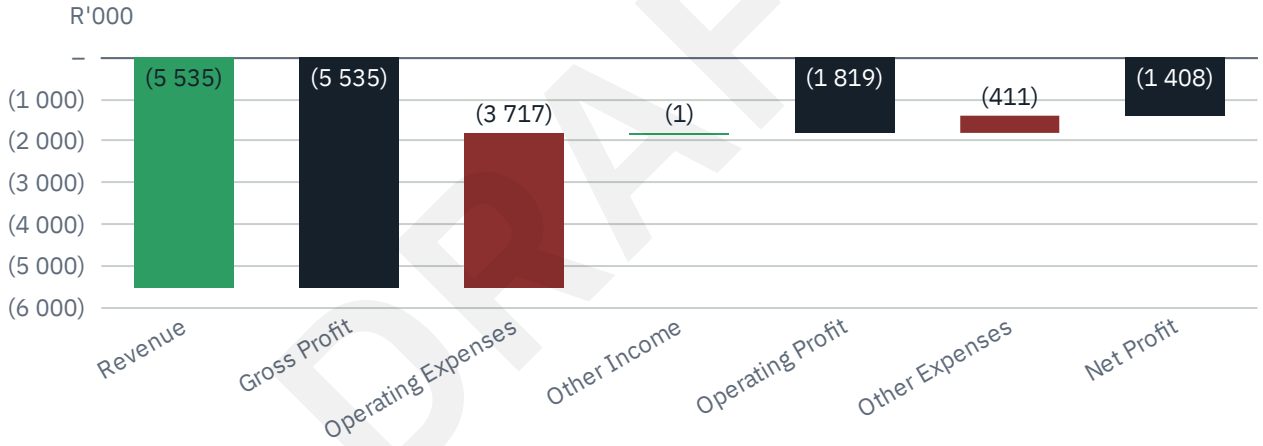

DRAFT

Revenue of (5 535) gives no meaningful margin base.

	R'000				
	ACTUAL	PRIOR[2]	CHANGE	CHANGE %	% OF REVENUE
Revenue	(5 535)	–	(5 535)	n/m[a]	n/m[b]
Cost of sales	–	–	–	n/m[a]	n/m[b]

Net profit[1]	**(1 408)**	**–**	**(1 408)**	**n/m[a]**	**n/m[b]**

a n/m — The prior figure is not a positive base, so no percentage change is meaningful.
b n/m — Revenue for the period is not positive, so a share of it is not meaningful.

Revenue of (5 535) bridges to net profit of (1 408).

DRAFT

DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY

Revenue moved the most in money, down 5 535.

Lines below zero

What this means Revenue (5 535), operating expenses (3 717), other income (1) and other expenses (411) are below zero: income accounts in net debit and cost accounts in net credit — a reversal, a refund or a posting made the wrong way round. Every margin divides by revenue, so each is reported as not meaningful rather than computed off a negative base. The ledger is reported as it stands; trace these accounts before relying on this sheet.

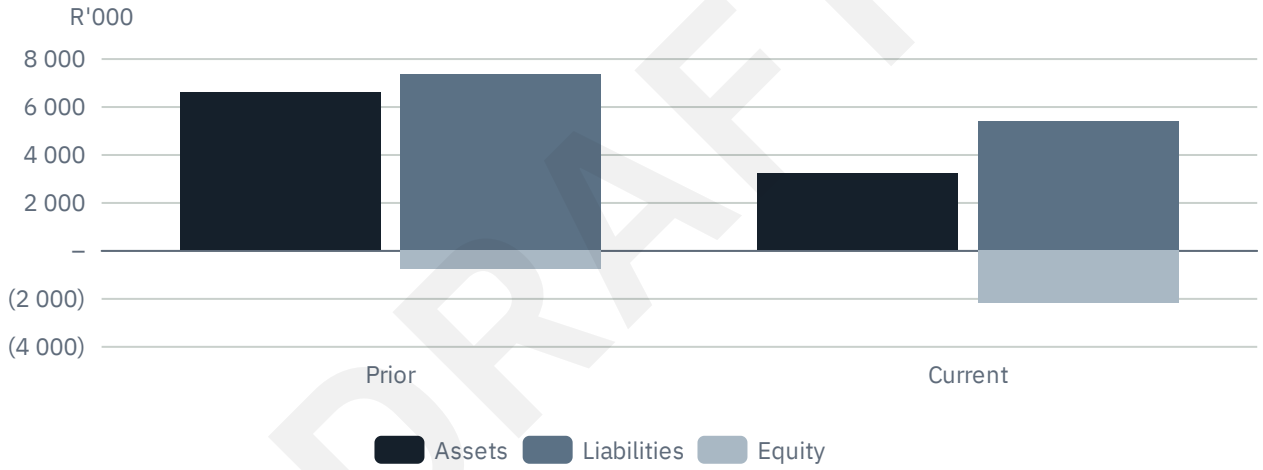

1 Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.
2 The prior column is the period 26 April 2025 to 31 December 2025 — 250 days, the same length as the reporting period.
3 The table states each line as the ledger carries it. The bridge below POSITIONS each bar by its effect on net profit — up where the line added to it, down where it took away — and COLOURS it by what the line is: green for income, red for cost, dark for a total, in every pack and whichever way the period ran. Operating Expenses of (3 717) in the table is labelled with that same figure on the bridge, drawn UPWARDS because that is the direction it increases profit, and in red, because it is a cost line. The label and the position are the same fact read two ways. A line with a nil figure for the period is not drawn: Cost of Sales. A line too small to draw at this scale is drawn as a hairline, so read its figure from the label rather than against the axis: Other Income.

Negative equity of (2 176).

	R'000			
	ACTUAL	PRIOR[2]	CHANGE	CHANGE %
Current assets[3]	(3 372)	143	(3 515)	(2463.6%)
Non-current assets	6 564	6 412	152	+2.4%
Total assets	**3 192**	**6 555**	**(3 363)**	**(51.3%)**
Current liabilities[3]	5 792	7 747	(1 955)	(25.2%)
Non-current liabilities	(424)	(424)	–	n/m[a]
Total liabilities	**5 368**	**7 323**	**(1 955)**	**(26.7%)**
Total equity[1]	**(2 176)**	**(768)**	**(1 408)**	**n/m[a]**

a n/m — The prior figure is not a positive base, so no percentage change is meaningful.

Assets of 3 192 are matched by liabilities of 5 368 and equity of (2 176).

DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY

Current assets cover current liabilities at negative 58.2% — a current ratio of (0.58); working capital stands at (9 164).

Balances below zero

What this means Current assets are (3 372), non-current liabilities (424) and trade receivables (330). None of these is a balance that can be held as stated: it means one or more accounts carry balances contrary to the band they are classified in. That is a classification or a posting question rather than a smaller figure, and the pack reports the ledger as it stands: the balances should be resolved before this sheet is relied on.

Negative equity

Consequence Total equity is (2 176). Liabilities exceed assets by this amount, which may affect covenant compliance and the going-concern assessment.

1 Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.
2 The prior column is the period 26 April 2025 to 31 December 2025 — 250 days, the same length as the reporting period.
3 Memorandum: trade receivables are (330) and trade payables nil at the period end, against nil and nil at the comparative period end, in R'000. The scorecard says why neither day count is measured: a denominator, not these.

DRAFT

Cash stands at (3 453); the comparative cash figure is negative, so the percentage change is not meaningful.

R'000

	ACTUAL	PRIOR[2]	CHANGE	CHANGE %
Opening cash[3]	**(267)**	**n/m**[a]	**n/m**[a]	**n/m**[a]
Operating cash flow	n/m[b]	n/m[b]	n/m[b]	n/m[b]
Investing cash flow	n/m[c]	n/m[c]	n/m[c]	n/m[c]
Financing cash flow	n/m[d]	n/m[d]	n/m[d]	n/m[d]
Closing cash[1]	**(3 453)**	**(267)**	**(3 186)**	**n/m**[e]

a n/m — The period before the comparative period is not in this pack, so there is no earlier opening cash balance to measure this one against.
b n/m — No operating cash flow figure was captured for this period.
c n/m — Investing cash flow is taken from capital expenditure, and no capital expenditure figure was captured for this period.
d n/m — No financing cash flow figure was captured for this period.
e n/m — The prior figure is not a positive base, so no percentage change is meaningful.

Movement in cash, and why no bridge is drawn

This period Cash moved (267) to (3 453) over the period, a movement of (3 186). No bridge is drawn because there is nothing to bridge THROUGH: this pack's figure set carries the period's cash totals and none of the operating, investing or financing figures a cash flow statement is made of, so every step between the two balances would be one unmeasured step the width of the whole movement. Ask for the cash flow statement for the split.

Closing cash fell from (267) at Oct 2025 to (3 453) at Sep 2026 (part), over 12 periods. Sep 2026 is a part month: it covers 7 of its 30 days, so its figure is not comparable with the months before it.

Commentary

This period No operating cash flow figure was captured for this period.

1 Figures are rounded to the nearest R'000, so components may not add exactly to the totals shown.
2 The prior column is the period 26 April 2025 to 31 December 2025 — 250 days, the same length as the reporting period.
3 Opening cash in the table above is the balance at the START of the reporting period. The closing-cash line below it plots 12 months to the period end and opens at Oct 2025, so it starts from the balance at that month instead. Different windows: the two need not agree.

DRAFT

0 of 1 scored target was met this period.

A. Profitability

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Gross margin	n/m[a]	+35.0%	n/m[a]	NOT MEANINGFUL
Operating margin	n/m[a]	–	n/m[a]	NOT MEANINGFUL

B. Liquidity

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Current ratio[1]	(0.58)	1.50	0.02	MISSED
Cash ratio	(0.60)	–	(0.03)	UNSCORED

C. Working capital

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Debtor days	n/m[b]	30 days	n/m[b]	NOT MEANINGFUL
Creditor days	n/m[c]	–	n/m[c]	NOT MEANINGFUL

D. Leverage

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Debt-to-equity	n/m[d]	0.50	n/m[d]	NOT MEANINGFUL
Interest cover	n/m[e]	–	n/m[e]	NOT MEANINGFUL

E. Cash flow

METRIC	ACTUAL	TARGET	PRIOR[2]	STATUS
Operating cash flow	n/m[f]	–	n/m[f]	NOT MEANINGFUL
Cash conversion cycle	n/m[g]	–	n/m[g]	NOT MEANINGFUL

a n/m — Revenue is not positive, so there is no turnover to take a margin of.
b n/m — Revenue is not positive, so days of sales outstanding cannot be measured.
c n/m — Cost of sales is not positive, so days of purchases outstanding cannot be measured.
d n/m — Equity is negative — liabilities exceed assets, so this ratio inverts and cannot be ranked.
e n/m — Interest expense is not captured in the pack figure set.
f n/m — No operating cash flow figure was captured for this period.
g n/m — No inventory could be identified in the chart of accounts, so the cash conversion cycle cannot be computed.

> DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY
>
> The miss is in Liquidity.

Scoring basis

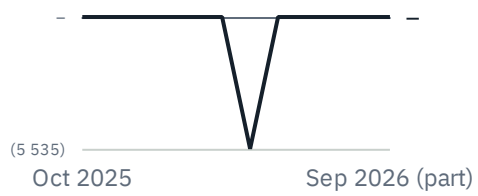

Definitions A target the figures cannot support is not scored; the basis page defines the terms.

1 Scored on current assets, which the balance sheet says cannot be held as stated; this pack does not adjust.
2 The prior column is the period 26 April 2025 to 31 December 2025 — 250 days, the same length as the reporting period.

DRAFT

Revenue is nil in both the first and last of the 12 months, and (5 535) at its furthest, in Apr 2026.

Revenue opened and closed at nil, reaching (5 535) in Apr 2026, over 12 periods.

Operating expenses opened and closed at nil, reaching (3 717) in Apr 2026, over 12 periods.

Net profit opened and closed at nil, reaching (1 408) in Apr 2026, over 12 periods.

Cash fell from (267) to (3 453) in Sep 2026 (part) over 12 periods.

DERIVED FROM THE FIGURES — NOT REVIEWED COMMENTARY

4 measures are drawn over the period; each panel states where it started and where it ended.

Reading these panels

Scale Revenue, Operating expenses, Net profit and Cash share one y-scale, so none of them can look like it moved more than it did.

Period Each panel plots one MONTH. The same measures print for the WHOLE period — revenue, operating expenses and net profit on the income statement page and cash on the cash page against the comparative. Different windows: the two need not agree.

Panels not drawn

Why A board pack tracks 6 measures on this page — revenue, gross margin %, operating expenses, net profit, cash and debtor days — and 4 of the 6 could be drawn for this company. A panel is omitted where its figure is meaningful in no period of the window: gross margin % and debtor days both need positive revenue, and no period here had any. Nothing is inferred in its place.

DRAFT

31 matters require a board decision, 30 of them carrying 9 386 of exposure, in R'000.

ISSUE	QUANTUM (R'000)	OWNER	DECISION REQUIRED
Annual Financial Statements for FY2026: 10 days overdue (due 28 August 2026)	n/m[a]	Company secretary	Whether to file immediately, accepting any penalty exposure.
Apr 2026: expenses for the month are a net credit — more was reversed out of expense accounts than was posted into them, so the month reports a loss even with the credit, as the period does. The quantum is that credit, 4 128; the month's net profit of (1 408) is that credit plus revenue and other income of (5 536).	4 128	Finance	Whether the reversals behind the credit belong to this period.
Aged debtor concentration: Blitz Fibre owes 3 192, 77.0% of all debtors owed on the aged debtors report, which come to 4 146, in R'000.	3 192	Credit control	Whether to escalate, hold credit, or refer the account for write-off.
Journal JE-2026-00084 (large round-number amount): Reversal of JE-2026-00056	207	Finance	Whether the entry's evidence stands, or it is referred for reversal.

27 further matters are not printed. A board pack is the same twelve sheets for every company however busy its ledger, so this table is held to the paper this page has: matters with no single rand amount are listed first, then the largest by exposure. In total they come to 1 859, in R'000.

a n/m — This matter has no single rand amount — an overdue filing, or a check that found nothing to quantify.

Movement Not tracked — no prior board pack is stored to compare against. The same for every matter listed above.

Commentary pending approval.

Two debtors figures

Aged debtors against the balance sheet The aged debtors report totals 4 146 and the balance sheet states trade receivables of (330), a difference of 4 476, in R'000. The report ages 4 146 of an open customer subledger of 4 165, the 19 between them being documents with no due date, which reach no aging bucket. Between that subledger and the trade-receivable control account in the general ledger: 4 175 across 29 open documents carrying no link to a journal entry and 320 across 98 postings that reference no document. Together they account for all of it, before rounding. On these books the two do not agree, this pack does not adjust either figure to the other, and the difference should be explained before any decision above that rests on a debtors balance is taken.

What was checked

Sources Aged debtor concentration, unreconciled bank items, unusual journals, overdue statutory filings and months whose expenses are a net credit. A source that fails is named as a matter, never dropped.

DRAFT

Prepared under IFRS for SMEs from the IsaFlow general ledger, in R'000; 3 caveats qualify these figures, printed with the contents.

Basis of preparation

Standard and currency IFRS for SMEs. ZAR in R'000.
Reporting entity Brightsphere Technologies (Pty) Ltd alone. These figures are not consolidated.
Period 1 January 2026 to 7 September 2026. The series ends on a part month: Sep 2026 covers 7 of its 30 days.
Comparative period 26 April 2025 to 31 December 2025

Source system IsaFlow general ledger
Rounding Components may not add exactly to the totals shown. A ratio taken on the unrounded figures may not reproduce from the rounded ones beside it.
Extracted at 8 September 2026 at 18:10 SAST
Ledger version 29 April 2026 at 12:39 SAST

Negative figures
In brackets — (12 345) — for money, percentages and ratios; a percentage in prose, in words. No minus sign is used in this pack. Only a positive value takes a +.

Not meaningful (n/m)
A measure the figures cannot support. The pack prints the reason rather than a number, never a zero. A dash (–) is that zero: a figure measured and nil, bar Scored below. A real amount too small to show at this scale prints as <1, or (<1) where it is negative.

Gross margin
Gross profit (revenue less cost of sales), as a percentage of revenue.

Operating margin
Operating profit as a percentage of revenue.

Net profit margin
Net profit, as a percentage of revenue.

EBITDA
Earnings before interest, tax, depreciation and amortisation — a non-IFRS measure: operating profit plus the period's movement on depreciation and amortisation. That movement is a NET CREDIT here — more reversed out of those accounts than posted in — so the add-back is negative and EBITDA sits below operating profit. The ledger's movement, not a sign error. No other adjustments.

	ACTUAL	PRIOR
Operating profit (IFRS)	(1 819)	–
Add back: depreciation and amortisation	(152)	–
EBITDA	(1 971)	–

Working capital
Current assets less current liabilities, in rand.

Current ratio
Current assets divided by current liabilities.

Cash ratio
Cash and cash equivalents divided by current liabilities.

Debt-to-equity
Total liabilities divided by total equity. Not reported on negative equity: the quotient inverts.

Interest cover
Operating profit divided by net interest expense. This pack captures no interest expense line, so it is reported as not meaningful.

Debtor days
Trade receivables over revenue, times 365 — an annualised figure on the scorecard and highlights, whatever the length of the reporting period.

Creditor days
Trade payables over cost of sales, times 365 — annualised, whatever the length of the reporting period. Not reported where there is no cost of sales.

Cash conversion cycle
Debtor days plus inventory days, less creditor days — each annualised on 365 days, as above. Not reported where no account is classified as inventory.

Operating cash flow
Cash generated by operations before investing and financing activities.

Scored, unscored and not meaningful
Scored against the platform's default target. A metric with no target is unscored rather than assumed met, and its TARGET cell prints a dash rather than a nil target; one the figures cannot support is not meaningful. Neither counts as a pass or a miss.

Colour

Key On the bridge, green is an income line, red a cost line and dark ink a total; all three also differ in lightness, so a monochrome copy still separates them. The balance sheet's bands are one ink at three lightnesses, legended on the chart. Red on the scorecard marks a missed target.

DRAFT
